- [✓ (a) influencing the customers]
- (b) influencing the superiors
- [✓ (c) influencing the group members]
- (d) influencing the competitors

(xii) EOQ Stands for
- [✓ (a) Economic Order Quantity]
- (b) Excess Order Quantity
- (c) Exempted Order Quantity
- (d) Expected Order Quantity

Group – B

(Short Answer Type Questions)

Answer *any three* of the following questions. 5×3=15

2. What are the different sources of conflict?
3. Give the advantages and disadvantages of MBO.
4. Differentiate between transactional & transformational leadership.
5. Distinguish between effectiveness and efficiency.
6. Write short notes on *any two*:
   - (a) Six sigma
   - (b) Kaizen
   - (c) Span of management

Group – C

(Long Answer Type Questions)

Answer *any three* of the following. 15×3=45

7. What is decision tree? How it is effective in organizational setting? A firm has an investment proposal, requiring an outlay of ₹ 1,60,000. The investment proposal is expected to have two years economic life with no salvage value. In year 1, there is a 0·4 probability that cash inflow after tax will be ₹ 1,00,000 and 0·6 probabilities that cash inflow after tax will be ₹ 60,000. The probability assigned to cash inflow after tax for year 2 is as follows:

The cash inflow year 1	₹ 1,00,000	₹ 1,20,000
The cash inflow year 2	Probability	Probability
	₹ 48,000 0·2	₹ 80,000 0·4
	₹ 64,000 0·3	₹ 1,00,000 0·5
	₹ 44,000 0·5	₹ 60,000 0·1

The firm uses a 10% discount rate for this type of investment.

Required;

(a) Construct a decision tree for the proposed investment project and calculate the expected net present value (NVP).

(b) What net present value will the project yield, if worst outcome is realized? What is the probability of occurrence of this NVP?

(c) What will be the best outcome and the probability of that occurrence?

(d) Will the project be accepted?

(Note: 10% discount factor 1 year 0·909 : 2 year 0·826)

8. What are the benefits of Ratio Analysis? Calculate the following ratios from the following information: 3+12=15

(a) Current ratio

(b) Liquid ratio

(c) Debt Equity ratio

Equity Share Capital	400,000	Good will	400,000
Preference Share Capital	200,000	Fixed Assets	600,000
Reserve & Surplus	100,000	Short Term Investments	200,000
10% Debentures	200,000	Sundry Debtors	100,000
Sundry Creditors	500,000	Cash in Hand	100,000
	1400,000		**1400,000**

9. What is marketing mix? Discuss briefly the elements of the marketing mix. Using 2014 as the origin, obtain a straight line trend equation by the method of least squares. Find the trend value of the missing year 2011. 8+7=15

2000	2002	2003	2004	2005	2006	2009
140	144	160	152	168	176	180

10. Write notes on *any three* of the following: 5×3=15

(a) Michael Porter's Model

(b) Linear regression

(c) CSR

(d) Free Rein Style

(e) Six Sigma

11. Discuss OC Curve and its four parameters. 10 samples, each of size 50, of pipe were inspected in pressure testing. The results of the inspection are given below:

Sample No.	1	2	3	4	5	6	7	8	9	10
No. of defectives	2	3	2	0	2	3	2	1	2	3

Draw the control chart for fraction defectives and state whether the process is under control. 7+8=15

12. Define Monopoly, Monopolistic and Oligopoly Market Structure. A firm uses exponential smoothing with smoothing constant 0·1 to forecast demand. The forecast for the week February 1, 2011 is 500 units, whereas actual demand turned out to be 450 units. D :

(a) Forecast the demand for the week February 8, 2011

(b) Assume that actual demand during the week February 8, turned out to be 505 units, forecast the demand for the week February 15, 2011. Continue forecasting through March 15, 2011, assuming subsequent demands were actually 516, 488, 467, 554 and 520 units. 7+8=15
